(54) Title: REAL-TIME INFORMATION SERVICE SYSTEM USING TITLE BAR, TASK BAR AND TRAY CLOCK OF WINDOWS

(57) Abstract: The present invention relates to a real-time information service system using title bar, task bar and tray clock of windows, which comprises real-time information server, router, public network and personal computer. The real-time information received from information server is displayed on title bar, task bar and tray clock of active windows of personal computer operating system. Therefore, it is possible to perform other works at office or home and look up new information at any time without special operation and interference of other program.
